years ago workmen’s compensation laws even in private business were unheard of; the worker assumed the risk. “The next development may be in the realm of public law; insurance against the social risk, the premiums of which will be paid by the risk creator—Society.”

J. A. SWISHER

This collection of zoning cases is to be an appendix to volume VI of The Regional Survey, and has been published in advance separately for reference purposes. The pamphlet contains no digest or abstract of zoning cases; it is rather an analytical index, conveniently arranged, for ready reference. Under different topics such as Area, Height, Use, etc. the names and references to decided cases may be found.

An index of zoning cases by states is also included. This is a bare list of cases without any indication of what point of zoning law was involved. There is also an alphabetical list of all the cases. The authors assert that it has been their endeavor to include all zoning cases which appeared prior to March 1, 1928. This compilation of cases, indexed as it is by topics should be useful to students of zoning or to zoning commissions.
